

ABĒNEX

SUSTAINABILITY
REPORT

2022

“

Climate change is a far-reaching phenomenon impacting every dimension of our environment. The last two years were, yet again, our planet's warmest years on record: severe heatwaves, droughts, wild fires, pouring rainfall, floods occurred subsequently all over the world. These dramatic events - and their consequences for the livelihood of so many - cannot be ignored.

Indeed, the conclusions and findings of the latest Intergovernmental Panel on Climate Change (IPCC)'s report exemplifies the urgent need to bring climate change to the forefront of the agenda. It also includes a call for action: now is the time to act. Of course, governments have a central role to play in ensuring the effective implementation of, and compliance with the Paris Agreement.

Notwithstanding, the private sector's size, importance, influence and economic firepower makes it a crucial player to address the climate crisis.

In particular, private equity is very well-suited to be among the sectors spear-heading the transition towards a low carbon economy. The PE model has, indeed, showed its mettle by demonstrating its ability to improve governance, trigger change, measure impact and disseminate best-practices across the economic landscape.

At Abénex, we strongly believe that in order to create long term value and future-proof the companies we support, considering the imperatives of sustainable growth is paramount. This is why, in 2021, we have decided to shift gear and increase the pace of our ESG initiatives' implementation. We have joined Initiative Climate International to engage with portfolio companies to reduce their carbon footprint, published our first Sustainability Report and organized the "Fresque du Climat" to further increase awareness of all our employees.

In 2022, we're capitalizing on this accelerating momentum by continuing to implement key

actions to drive change. We are refining our way of incorporating ESG in the investment process: prior to and post investment in portfolio companies.

We strongly believe that organizations perform better when they foster an inclusive environment where differences are valued, supported and respected. As Abenex's team has continued to grow, we aim at driving further initiatives to enhance and promote diversity and inclusion. We are very pleased to see progress, for example, with more nationalities and a majority of women represented amongst new joiners.

Patrice Verrier & Olivier Moatti,
Managing Partners

Who We Are

As a pioneer in the French private equity market since 1992, Abénex capitalises on its unrivalled experience to partner with management teams of Small and Midcap businesses, supporting companies in their long-term growth and operational optimization projects. Abénex is committed to the success of managers and their teams by providing them with a dedicated operating team to support their main transformation projects and their external growth strategy.

Pursuant to their entrepreneurial heritage and as a natural extension of the deep investment experience, Abénex has expanded its investment activities into the real estate sector, identifying and investing in select attractive opportunities in the Paris area.

Independent player for almost 15 years, Abénex has been involved in growth capital operations, as a minority or majority shareholder.

In Smallcap, the team carries out operations in SMEs up to **€50 million** in valuation; in Midcap, the team invests in SMEs valued between **€50** and **300 million**.

In real estate, Abénex invests in Value-Add projects for assets of up to **€80 million** in value, and in Core + opportunities of more than **€50 million** in value, particularly in distribution, logistics, managed residences and education.

Based in Paris and Lyon, the team is composed of 40 professional as of January 2022, with proven and recognized expertise.

Our Values

Passion for entrepreneurs and management teams

We are keen to create an ambitious but realistic sustainability action plan in partnership with management teams, to facilitate seamless communication which enables us to listen to companies' needs and actively support them with any issues they face.

Close-knit and committed team

We attach great importance to the development of tailored teams that are best placed to address the specific needs of a company. It includes investment, operational and ESG professionals to fully support the company and foster a close working relationship.

Integrity and professionalism

Our reputation for integrity and professionalism is a key ingredient to our long-term success. We take responsibility for our decisions and strive to ensure that there is a continued alignment of interests and a mutual positive outcome. Our team is continuously improving and challenging the discussions and the actions, with the goal of delivering the best possible results for every situation we encounter.

Abénex ESG
HIGHLIGHTS

Labels & Charter

Label Relance
of the French Ministry
for the Economy and Finance

Abénex obtained the Label Relance for its fund Abénex VI, a label recognizing funds that undertake to quickly mobilize new resources to support the equity and quasi-equity of French companies (SMEs and Midcap). This label allows to jump start the French economy, impacted by the sanitary crisis. Labeled Funds must also comply with a set of environmental, social and good governance (ESG) criteria, including the prohibition of financing coal activities and monitoring all portfolio companies with an ESG rating.^[1]

iCi
Abénex has joined the Initiative Climate International
(iCi) in 2021

Launched in 2015, the iCi was endorsed by the UN PRI in 2019. The initiative believes that the consequences of climate change will generate both risks and opportunities for investee companies. Private equity, with its levers for transformation and growth, has a vital and unique role to play in driving the transition to a zero-carbon, climate resilient global economy, and ultimately achieving the Paris Agreement’s objective of limiting global warming well-below 2°C.

We acknowledge that climate change will have adverse effects on mankind, and are convinced that addressing it will present both risks and opportunities for investments and joining forces will help economic actors to contribute to achieving the objectives set by the Paris Agreement. We are committed to actively engage with portfolio companies to reduce their greenhouse gas emissions, contributing to ensure the long-term sustainability of their performance.

Parity Charter
of France Invest Signatory
since 2020

By signing the charter, all signatories, including management companies and institutional investors invested in unlisted companies, affirm their determination to resolutely adopt an active approach to promote gender parity in management companies and in companies supported by French private equity^[2]. The aim of this charter is for all financial actors to collectively reach the following percentages of women:

- **25%** of the persons with responsibility for investment committee decisions by 2030 and **30%** by 2035;
- **40%** of investment teams by 2030.

PRI
Signatory
since 2010

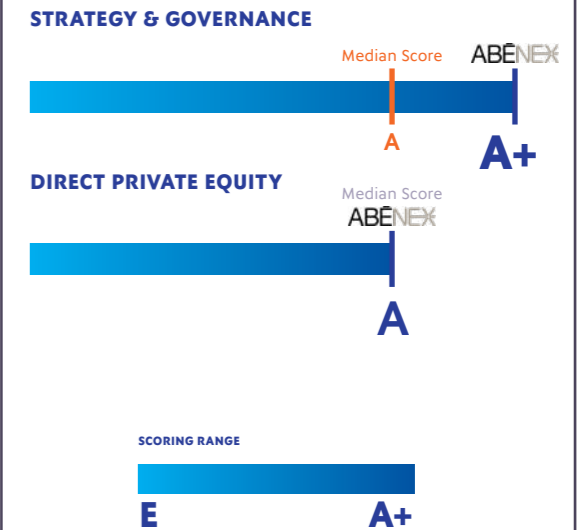

The PRI (Principles of Responsible Investment), a UN-supported network of investors, is the world's leading proponent of responsible investment. It works to understand the investment implications of environmental, social and governance factors and to support its international network of investor signatories in incorporating these factors into their investment and ownership decisions.

ESG Highlights Of 2021

Quarterly Sustainability Committee

The Sustainability committee, which meets quarterly, is comprised of: a Managing Partner (in his capacity of ESG Leader); the CFO, the Sustainability Officer, the head of Operational team and a partner from each of the Investing teams (Real Estate, Small & Mid).

Recruitment of a Sustainability Officer

100% ESG dedicated resource to analyse extra-financial data, assist portfolio companies and implement Abénex ESG strategy within the management company.

Signatory of the iCi

We are committed to contribute to the Paris Agreement's objective and actively engage with portfolio companies to reduce their carbon footprint.

Inclusion of an ESG section in quarterly reports & General Assembly

Highlighting the main ESG initiatives of portfolio companies achieved over the trimester for all active funds.

Carbon Footprint Assessment

We have assessed for the second time our carbon footprint with two different assessment methods.

Our active Funds are classified Article 8 of SFDR

We promote ESG characteristics within our PE funds with systematic ESG due diligence, annual ESG reports and ESG follow-ups reports.

Publication of our First Sustainability Report

Abénex has shared transparently its ESG processes, metrics and progress, to foster a positive impact on its portfolio companies and all of its key stakeholders.

Our Sustainability Policy

Exclusion List

We do not invest in:

- Illegal economic activity including all production and trade not permitted by law or by regulations
- Companies that violate fundamental international treaties (such as those covering human rights, child labour and forced labour)
- Companies that engage in any form of corruption, fraud or money-laundering
- Industries such as weapons and ammunition of any kind, tobacco, alcohol, gambling, coal, pornographic industry and prostitution

Before Investment

ESG is embedded in our investment strategy and investment cycle.

ESG due diligences and carbon footprints are systematically carried out during the pre-investment process to assess risks and opportunities and constitute a key factor when assessing the potential feasibility and interest of an investment. Based on sector relevance, a wide range of criteria are covered such as: ethical issues, environmental impacts, gender parity, activities' impact on biodiversity, circular economy actions, etc. Additionally, an ESG clause is typically included in shareholders' agreements where every stakeholder commits to take into account ESG criteria within their activities. The terms of LBO debts typically include ESG criteria as KPIs in the calculation of interest rates.

We capitalise on every opportunity to raise awareness about ESG topics to our portfolio companies at each level. For instance, last year we sent out a copy of "Le Monde Sans Fin" from Jean-Marc Jancovici to all CEOs of our portfolio company, illustrating our conviction that long-term value creation needs to include sustainability requirements.

During Investment

During our holding period, we collaborate alongside the managers of our portfolio companies to guarantee effective implementation and outcomes of ESG initiatives.

Abénex provides portfolio companies with access to the expertise of specialised consultants to define sustainability action plans and follow-up processes.

Areas which we typically cover include: carbon footprint assessment, nominating independent board members, reducing turnover and absenteeism rates, etc.

We annually collect and analyze ESG data from portfolio companies through a thoroughly documented and formalized process.

Systematically, the deal team and external consultants monitor each portfolio company, which are also assigned an Abénex ESG coordinator to oversee the process.

We conduct an ESG vendor due diligence (VDD) for each exit, highlighting the main ESG evolution of the company during the holding phase. Additionally, we thrive to open the shareholding of every company to managers in order to share value with as many people as possible.

***Follow-Up
Process During
Detention Phase***

1
***Abénex
ESG Coordinator***

at each new investment, an Abénex ESG Coordinator is appointed to lead and coordinate the stewardship of the ESG effort with a Corporate Social Responsibility (CSR) representative of the portfolio company throughout the entire detention phase.

6
***Yearly follow-ups
of ESG initiatives***

decided at board level with the management of each portfolio company generating a scalable impact.

2
***A questionnaire
with 70+ indicators***

is sent out to the CSR person in charge of the portfolio company by an external consultant and monitored by the ESG Abénex Coordinator. The questionnaire is completed with qualitative interviews of multiple stakeholders of the portfolio company.

3
***A detailed
ESG report***

is drafted based on the questionnaire and interviews. A thorough action plan is formalized within the report.

4
***Presentation of an
ESG action plan
during internal
Abénex meetings***

key ESG initiatives, issues, progresses and projects are discussed during an annual meeting dedicated to ESG topics, and clear objectives with indicators are set.

5
***Collaboration is key
to our approach***

we communicate with portfolio companies' management on the relevant ESG topics and action plan, whether during board meetings where we systematically sit or dedicated ESG meetings.

FRONT OFFICE		MID OFFICE	BACK OFFICE
57% of associate positions	33% of managers positions	50% of manager & officer positions	67% of support functions

Training

100% of employees
received an ESG training in 2021

Employees are offered regular training and can benefit from any specific training upon their request

At Abénex, we strongly believe that diversity makes us more united.

Abénex is committed to undertake initiatives to enhance and promote **diversity and inclusion** at the Firm and portfolio company level.

We aim at providing every team member with **what they need to succeed and thrive**, and value individual contributions and differences.

Abénex has formally committed to **promote diversity** within the private equity industry through the endorsement of a number of initiatives (**France Invest Parity Charter** and **Level 20 notably**)*.

* more information on Level 20 on p. 40

8 out of **9**
new joiners were women
(90%) in 2021

In 2021, we have accelerated our efforts to **improve diversity** in our workforce. We have created an **inclusive workplace** allowing greater effectiveness and improving **employee retention** while enhancing forward thinking. In 2021, 8 out of 9 (90%) recruitments were women, and **25% of new joiners had an international profile**.

Diversity & Inclusion

Apprenticeship Model

Career pathway & talent development

50%

of mid-cap Partners and Directors started as Associate/Managers

Mentoring

new joiners benefit from a mentoring program whereby senior members of the team share Abenex's values and culture, as well as their personal experience

Communication & idea generation:

- Weekly firm-wide & team meetings
- Annual firm-wide offsites to promote our corporate culture

Personal Development

Training program has been implemented, workshops organized regularly

Seeking and providing **constructive feedback** is part of Abénex's DNA

Informal **knowledge and know-how sharing** across the organisation is highly encouraged

Sustainable Actions Within the Offices

"To take actions against climate change, we first need to understand the problem."

Jean-Marc Jancovici, *energy and climate expert*

This is why all employees took part in the "Fresque Du Climat", a workshop based on the latest IPCC report which aims at raising awareness on climate change and explores ways to reduce our carbon footprint both at individual and corporate levels.

Our CO₂ emissions reduction plan

Systematically opt for **train transportation** whenever possible as opposed to planes, especially for trips of less than 1 000 km.

Try whenever possible **commuting to work** using public transportation, bicycles or walking as opposed to using personal cars.

As often as possible, we encourage online meetings using a videoconference tool as an alternative to face-to-face meetings, reducing CO₂ emissions used for transportation.

Reduce Energy Consumption

We switched to a **green electricity provider** for our offices.

Windows are equipped with **detectors** to turn off heating and air conditioning when opened.

Motion light detectors and LED lights were installed.

Reduce waste

New cars of the Abénex car fleet must **respect environmental norms**.

Hybrid and environmentally friendly cars are highly recommended.

Electric cars used by caterers and couriers is one of Abénex selection criteria. Employees are encouraged to take green taxis as well.

We installed coffee machines with organic and fair-trade coffee beans to get rid of single-use coffee cups and coffee pods. We thus spared every year **100 kg of coffee pods**, which represents **6,400 capsules**. A capsule emits on average **50 g of CO₂**, which means Abénex saved **320 kg of CO₂**, the equivalent of the production of **20 smartphones**.

We initiated discussions with our landlord and the town hall of the 8th district, and successfully obtained the setup of **recycling bins for the entire building**.

Water fountains were installed to avoid plastic water bottles and reusable water bottles were given to employees. Ultimately, this change allowed Abénex to save yearly **119 kg of plastic bottles** which represents **405 kg of CO₂**, the equivalent of driving **2,100 km by car**.

Our Community Engagement

As part of its community engagement, Abénex is proud to have supported three charities in 2021.

The charities have been selected for the alignment of their mission with Abénex's values, their outstanding work in supporting local communities, and their ability to measure and report on the social impact of their actions:

For 20 years, PLAY International has invested in sport as a lever for education and social change.

Its action in the field shows that it is possible to positively impact the life course by inventing new ways of using physical activity and sport: to promote learning and develop life skills; to facilitate dialogue between war-battered communities, etc. (20K€)*

Founded in 2002, Espérance Banlieues's objective is to fight against and prevent early school leaving, provide high quality education and promote the development of innovative schools in less-favoured areas. The charity supports 17 schools with over 900 pupils. (30K€)*

A global nonprofit organisation which backs outstanding charities and supports social innovation to change the lives of disadvantaged youth. (20K€)*

*The total amount donated accounts for c. 0.5% of Abénex's Sales

**#ESG #SociallyResponsibleInvestment #PrivateEquity
#Sustainability #SocialImpact #CommunityEngagement**

Our Community Engagement

We intend to improve gender parity throughout the economy but also more specifically in the private equity industry. One way to achieve this is by providing women with mentorship and coaching. Some of our Investment team members are mentoring women in the private equity industry, as part of the initiatives taken by Level 20, a not-for-profit organisation dedicated to improving gender diversity in the European private equity industry.

This year again, the Abénex Apprenticeship tax has been donated to a school located in the Parisian suburbs reducing drop-out rates through interdisciplinary systems and personalized support.

Play International Challenge

In addition to the aforementioned donation, Abénex is proud to have participated to the second edition of the digital Vertigo Challenge. The entire team was on the move for 3 weeks, walking, running and cycling. We donated 7 214€, 1€ for each km traveled. The association collected in total 45 000€ during this challenge to roll out their programs for children around the world. Abénex is looking forward to take on this challenge again next year, with an objective to walk, run and cycle at least 8 000 km.

04.

ABÉNEX FUNDS FROM AN ESG STANDPOINT

Aggregated Portfolio Data

An ESG questionnaire of 70+ indicators, has been sent out to all our portfolio companies in Fund Abénex VI (Midcap), Fund Abénex V (Midcap) and Fund Abénex Croissance (Smallcap). The aim of this extra-financial indicators questionnaire is three-fold.

First, it helps portfolio companies to define their CSR strategy by focusing on improving relevant indicators. Second, extra-financial data raises awareness on the main risks of the company's sector whether linked to climate change or to cyber-security, or else. Finally, it allows Abénex to have a transparent and open dialogue with portfolio companies and influence to their constant improvement.

Examples of Human Resources Indicators

Total permanent **FTE**, annual turnover rate, gender **parity**, **diversity**, number of disabled employees, training budget (expressed as % of total payroll), employee profit sharing scheme, number of lost days due to work accidents, accident frequency rate, accident severity rate, absenteeism rate, social litigations, etc.

Example of Corporate & ESG governance Indicators

Number of board members, number of **independent board members**, number of female board members, performance monitoring mechanism, number of women in the executive committee, appointment of sustainable development / CSR Manager, ESG issues discussed during Boards, **CSR initiatives** (CSR policy, Certifications, CSR Report), policies and laws for good business conduct (Loi Sapin II), ethics litigations faced, responsible procurement charter, ESG considerations in referencing suppliers, main risks linked to the value chain, risk management measurement, etc.

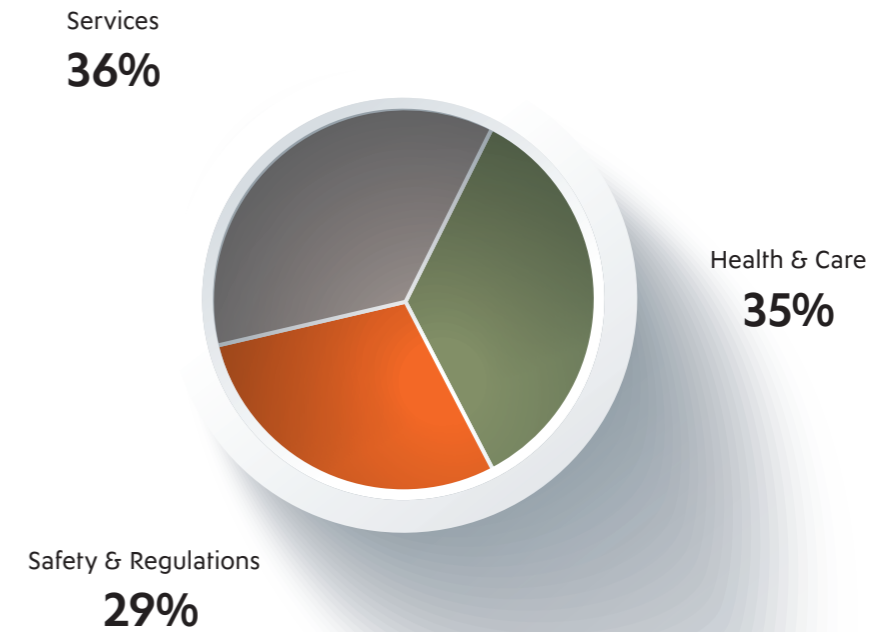

Example of Environment Indicators

Formalized environmental policy, exposure to climate risks, assessment of **carbon footprint** (scope 1, 2 or 3), environmental management system implemented, environmental programs (for instance energy performance improvement, increase in renewable energies, reduction of greenhouse gas emissions, waste reduction, **biodiversity** and ecosystem protection), etc.

Location of Portfolio Companies Headquarters

Distribution of Portfolio Companies by Sector

Human Resources indicators

Founded in 1993, Edition et Développement Logiciels (« EDL ») is a leading software provider for medical imaging services. With its Xplore software, EDL offers its customers a fully modern, integrated and SaaS-ready solution which facilitates information sharing and improves the performance of medical imaging departments. Xplore is praised for its ergonomics, its wide set of functionalities and its proven robustness. The solution notably enables an efficient roll-out of tele-radiology within multi-site organizations as well as swift communication flows between radiology departments and the complex medical environment with which it interacts on a daily basis.

EDL is the French market leader (>50% market share) of radiological information systems for both public and private clients, with presence in Switzerland and Germany. It offers a best-in-class, state-of-the-art, full-web/SaaS-ready software, recognized as such by its users and its competitors. The Group has progressively expanded its offering to complement the RIS with :

- Xplore PACS (Picture Archiving and Communication System)
- Xplore SIMeN (dedicated to nuclear medicine services)

ESG Snapshot

Environment:

- Replacement of fluorescent lights with LED lights and of plastic water bottles with water fountains in all offices.
- HDS accreditation (Certification des Hébergeurs de Données de Santé, ISO 27 001 equivalent) for its software « Xplore ».

APPENDICES

Sustainable Development Goals (SDGs)

The Sustainable Development Goals (SDGs) or Global Goals are a collection of 17 interlinked global goals designed to be a «blueprint to achieve a better and more sustainable future for all».

The SDGs were set up in 2015 by the United Nations General Assembly and are intended to be achieved by the year 2030. Today, the SDGs represent a worldwide framework to align a CSR strategy for every company.

The SDGs provide a coherent, holistic, integrated framework to address the world’s most urgent sustainability challenges and creates a better future for all.

The success of the agenda will be based on collaborative efforts by all parties in society, including businesses. Therefore, the SDGs explicitly call on businesses to contribute along with other stakeholders.

From a risk management or a development opportunity perspective, it is in the interest of companies to step up and engage with the core questions that lie at the heart of the SDGs.

Throughout the report, material ESG issues identified for the portfolio companies are paired with relevant contribution to SDGs targets based on the materiality diagnosis of PWC.

17 Goals **169** Targets **230** KPIs

KEY NUMBERS OF THE SDGS

CSR Label Glossary of Portfolio Companies

ISO STANDARDS – INTERNATIONAL ORGANIZATION FOR STANDARDIZATION

ISO 14001 is the international standard that specifies requirements for an effective environmental management system (EMS). It provides a framework that an organization can follow, rather than establishing environmental performance requirements.

ISO 9001 is defined as the international standard that specifies requirements for a quality management system (QMS). Organizations use the standard to demonstrate the ability to consistently provide products and services that meet customer and regulatory requirements.

ISO/TS 29000 is a document defining quality management system requirements for product and service supply organizations to the petroleum, petrochemical and natural gas industries.

ISO 13485:2016 is the standard for a Quality Management System (QMS) for the design and manufacture of Medical Devices.

ISO 22716 gives guidelines for the production, control, storage and shipment of cosmetic products.

ISO/IEC 27001 is an international standard on how to manage information security. It details requirements for establishing, implementing, maintaining and continually improving an information security management system (ISMS) – the aim of which is to help organizations make the information assets they hold more secure

GENERAL CSR – INITIATIVES, LABELS, CERTIFICATIONS BODY

Sustainability Initiative

The UN Global compact is a call to companies to align strategies and operations with universal principles on human rights, labour, environment and anti-corruption, and take actions that advance societal goals. Over 17,500 companies have become signatory of the UN Global Compact.

Evaluation Labels

The Label Engagé RSE (CSR Committed Label) is the benchmark label for evaluating the maturity of organizations' CSR approaches on the basis of ISO 26000. The label is aimed at all types of organizations (companies, associations or territory) and whatever the maturity in CSR, the size of the entity or the sector of activity.

Founded in 2007, EcoVadis is now the largest provider of business sustainability ratings, with a global network of more than 75,000 rated companies. EcoVadis provides holistic sustainability ratings service for companies, delivered via a global cloud-based SaaS platform. The EcoVadis Rating covers a broad range of non-financial management areas including Environmental, Labor & Human Rights, Ethics and Sustainable Procurement impacts.

Certification Body

Ecocert is a rigorous process that consists of an independent and impartial certification body assessing the conformity of a product, service or system with environmental and social requirements specified in a standard. At the end of the certification process, Ecocert issues a decision and when positive, delivers a written assurance called a certificate.

Since 1995, Bureau Veritas Certification has been the subsidiary of Bureau Veritas dedicated to the certification business. It carries out its audit activities with complete impartiality and independence. Bureau Veritas Certification is a major player in certification and auditing in the areas of quality, health / safety, environmental protection and sustainable development.

SPECIALIZED CSR LABELS

MASE is a management system whose objective is the permanent and continuous improvement of the Safety, Health and Environment performance of industry and services companies.

The French National Cybersecurity Agency (ANSSI) ensures that public administrations, public services, and businesses can take full advantage of a secure and trustworthy digitalisation. The agency can also qualify companies as service provider for information systems security audit, as it was for the case for Squad.

The Pyramids competition organized by the Federation of real estate developers, aims to promote the most beautiful real estate projects throughout France. The Pyramids are centered on the essential subjects of the Federation: innovation, quality, technical performance, aesthetics, responsibility in the conduct of operations, customer relations and the emergence of new talents.

PRODUCT-RELATED LABELS & STANDARDS IN THE MANUFACTURING INDUSTRY

The label "Indoor air emissions» includes a pictogram accompanied by a letter in large format. This letter indicates the level of volatile pollutants emission of the product within the air inside a room: the rating ranges from «A +» (the product emits very little or not at all) to «C”.

CTB is a certification that assesses the performance of products, their lifecycle, and their impact on health and the environment. The product's composition is analyzed by a commission of toxicologists and ecotoxicologists independent of FCBA which have to issue a positive opinion on these requirements for the product to be certified. Blanchon was the first player to get CTB certified.

This European Standard 'bio-based formula' uses a method for determining the bio-based carbon content in products from the measurement of radiocarbon.

The EU Ecolabel covers a wide range of product groups, from major areas of manufacturing to tourist accommodation. Key experts, in consultation with main stakeholders, develop the criteria for each product group in order to decrease the main environmental impacts over the entire life cycle of the product. Because the life cycle of every product and service is different, the criteria are tailored to address the unique characteristics of each product type.

PRODUCT-RELATED LABELS IN THE FOOD INDUSTRY

Free range eggs can be described by hens which have access to the outdoors (4m² per hen), and can shelter in a building where they have nests, perches and the food they need. This represent the second best conditions for hens, after organic eggs with 5m² per hen.

The Label Rouge (meaning Red Label) is a French label designating products which, by their production or manufacturing conditions, have a higher level of quality compared to other similar products usually marketed. The products that can benefit from a Label Rouge are food, non-food and unprocessed agricultural products.

The High Environmental Value (HVE) guarantees that the agricultural practices used on an entire farm preserve the natural ecosystem and minimize the pressure on the environment (soil, water, biodiversity, etc.)

AB (Organic Agriculture) is a French quality label created in 1985, and based on the ban on the use of products from synthetic chemistry. It identifies products from organic farming.

Launched in 2002 as Utz Kapeh meaning 'Good Coffee' in the Mayan language Quiché, the UTZ certification shows consumers that products have been sourced, from farm to shop shelf, in a sustainable manner.

WORKPLACE-RELATED LABELS

'Great Place to Work' is the first step to be recognized on the Best Workplace list, based on survey of employees working in companies all around the world. The certification process starts with an employee feedback gathered with the research-driven Trust Index[®] survey, followed by a culture audit of the company. If the Trust Index[®] results are 65% or higher, the company can be certified.

The 'HappyIndex' explores and promotes employees engagement and motivation. It also benchmarks the company to see where they stand compared to others, and attracts new talents giving a positive image of the workplace where employees are happy and motivated by their missions.

Acknowledgement

We wanted to thank the management of all of our portfolio companies for completing our ESG questionnaire and answering qualitative interviews.

We also would like to thank all of our stakeholders who participated in the elaboration of our second Sustainability Report, and also all Abenex employees for their commitments to ESG impact.

We are all working together towards a more sustainable world where tracking progress will allow every portfolio company to make the change they need to face the urgent climate issues and the current sanitary crisis. We are very proud to be an active actor of the ecological transition alongside them.

We are looking forward to our second sustainability report to share with all of you the impact we will have in the coming year as much at our portfolio companies' than at Abénex's level.
